## HVNS LIBRARIAN'S PICKS

### BOOK

#### The Complete Guide to Mercury Dimes, Second Edition by David Lange

Noted numismatic author, David W. Lange, has completely rewritten his classic reference book on Mercury Dimes. This all-new edition contains over 250 fully-illustrated pages, loaded with information on this popular series. The book contains a rich history of the series, along with its designer. The meat of the book, however, is a date by date analysis of the entire series complete with photos of each issue, major known die varieties, certified populations, values and more.

### DVD

#### **“Technical vs. Market Grading”** by Robert Campbell

The difference between market and technical grading affects not only conceptual terms but also valuation of the coin being graded. This area of controversy is no more polarized than between market-based third-party grading and the technical grading of the Early American Coppers group. This 69 minute DVD explains the differences between the two grading systems and how different organizations grade a coin and the criteria they use.
